How does this year deliver your curriculum intent?	The Y7 curriculum in Technology and Art is about acquiring the basic skills that students need to form the foundations which underpin progress in later years. Lessons are often practical based with emphasis on the correct use of equipment and processes to create a successful outcome.				What does the end of year assessment look like?	During each art/tech rotation, students will be assessed against practical and theoretical criteria. Practical assessments will take place during practical lessons, through teacher observations against criteria which focuses on skill application and quality of final pieces. Theoretical assessments will be assessed towards the end of each rotation in a short written assessment which focuses on knowledge and understanding of theoretical topics covered.
